1953 List of Orchids

WE ARE MAILING THIS LIST TO OUR MAIL-ORDER CUSTOMERS OF THE PAST TWO YEARS SO YOU WILL HAVE THE SAME OPPORTUNITY TO SECURE THOSE YOU WANT THAT OUR LOCAL CUSTOMERS HAVE.

MANY OF THE VARIETIES LISTED WILL BE SOLD BEFORE SPRING SO IF THERE IS SOMETHING ON THIS LIST YOU WANT WE SUGGEST THAT YOU ORDER THEM NOW AND WE WILL HOLD THEM FOR YOU UNTIL THE WEATHER IS SUITABLE FOR SHIPPING THEM. We do not advise shipping during cold weather but will do so if you are willing to take the risk involved.

Many of our customers have written us asking about the rarer and different unusual varieties of orchids. We have been interested in these for several years and after much effort and much disappointment we were able to secure some of them for breeding purposes, therefore we are now able to offer several new hybrids as well as self crosses of these unusual varieties.

We also offer in this list a limited number of imported varieties of these unusual types. High Air-freight costs, fumigation and poor condition of the plants upon arrival make importing plants a risky business. Those we offer are only those plants which have been able to stand this treatment and have a good chance of being healthy established plants again.

FRANKLIN W. GAMBLE
ORCHID NURSERY

62 Shell Road-Alto

Mill Valley California

1953 Offer of
ONCIDIUM AND ONCIDIUM X MILTONIA HYBRID
Seedlings

- #607 *Oncidium Tigrinum* x *Oncid. Crispum*. Named *Oncid. Bandianum*.
These have not flowered for us as yet so results are unknown.
They should be long lasting and beautiful. only a very few
Available in 1½ inch pots at \$2.50 each.
- 619 *Miltonia Blueana* x *Oncidium Stelligrium*. We Call this *Oncidtonia*
Mariposa(spanish for Butterfly.)Those which have flowered have
the markings of the California *Mariposa Lilly* on a white back-
ground. Completely new and very beautiful. only a very few plants
available in 1½ inch pots at \$5.00 each.
- 616 *Oncidium Rogersii* x *Oncid. Flexosum*. Named *Oncid. Java*. Long
lasting flowers, prolific bloomers. Small plants at \$2.50 each.
- 656 *Miltonia Candida* x *Miltonia Regnellii*. Named *Miltonia Binotii*.
These types of *Miltonias* that look more like *Oncidiums*, the
flowers open one at a time and are in flower over a long period.
Only a few plants available at \$2.50 each.
- 566 *Miltonia Candida* x *M. Spectabilis* var. *Mooreliana*. Similar
to the above except that the flowers should be larger and last
longer. few plants available at \$3.50 each
- 567 *Miltonia Candida* x *M. Spectabilis* var. *Bicolor*. similar to the
above except there should be a difference in color of the
flowers. very few plants available at \$3.50 each.
- 631-632
Oncidium Rogersii x *Miltonia Spectabilis* var. *Mooreliana*.
This is a beautiful thing. A few have flowered for us last
year and they were long spikes of a dozen or more flowers
which were up to three inches in diameter of perfect form of
a Dancing Girl with large ruffled skirt. The colors varied
from cream, yellow, gold and green, each with contrasting
markings. The plants which flowered were only in 2½ inch pots
and we expect the flowers and spikes will be larger this year.
They flower over a long period and are wonderful cut-flowers.
Only a few plants to offer. Most were sold last year. Plants
in 1½ inch pots at \$5.00 each. (Don't order this unless you
appreciate new and beautiful novelties.)

This offer is very limited and undoubtedly the available plants
will be sold within 30 days after this list reaches our customers.

1953 Offer of
ONCIDIUM AND ONCIDIUM X MILTONIA HYBRID
Seedlings

- #607 Oncidium Tigrinum x Oncid. Crispum. Named Oncid. Bandianum. These have not flowered for us as yet so results are unknown. They should be long lasting and beautiful. Only a very few Available in 1 1/2 inch pots at \$2.50 each.
- 619 Miltonia Bluesens x Oncidium Steiffertum. We call this Oncidium Mexiposa (Spanish for Butterfly). Those which have flowered have the markings of the California Mariposa Lilly on a white background. Completely new and very beautiful. Only a very few plants available in 1 1/2 inch pots at \$2.00 each.
- 616 Oncidium Rogerett x Oncid. Flexuosum. Named Oncid. Java. Long lasting flowers, brilliant bloomers. Small plants at \$2.50 each.
- 626 Miltonia Candida x Miltonia Regnellii. Named Miltonia Binotii. These types of Miltonias that look more like Oncidiums, the flowers open one at a time and are in flower over a long period. Only a few plants available at \$2.50 each.
- 666 Miltonia Candida x M. Spectabilis var. Moorhousii. Similar to the above except that the flowers should be larger and last longer. Few plants available at \$3.50 each.
- 667 Miltonia Candida x M. Spectabilis var. Bicolor. Similar to the above except there should be a difference in color of the flowers. Very few plants available at \$3.50 each.
- 631-632 Oncidium Rogerett x Miltonia Spectabilis var. Moorhousii. This is a beautiful thing. A few have flowered for us last year and they were long spikes of a dozen or more flowers which were up to three inches in diameter of perfect form of a Dancing Girl with large ruffled skirt. The colors varied from cream, yellow, gold and green, each with contrasting markings. The plants which flowered were only in 2 1/2 inch pots and we expect the flowers and spikes will be larger this year. They flower over a long period and are wonderful cut-flowers. Only a few plants to offer. Most were sold last year. Plants in 1 1/2 inch pots at \$2.00 each. (Don't order this unless you appreciate new and beautiful novelties.)

This offer is very limited and undoubtedly the available plants will be sold within 30 days after this list reaches our customers.

RARE AND UNUSUAL VARIETIES OF
CATTLEYAS AND LAELIAS AND OTHER ORCHIDS

Please read this paragraph before ordering plants from this list.

The plants listed on this page are newly imported plants which have been potted for several months and are becoming established but will require good growing conditions to bring them to condition to flower. We do not recommend newly imported plants for beginners, but offer these to experienced persons who have the proper conditions and know how to care for them. We do not have many of any of these varieties as they are hard to find and expensive to import. We will not ship any of these before spring 1953 and then only when the new growths are sufficiently hardened up to ship without too much risk of damage.

Laelia Cinnabarina; Plants grow from 6 to 13 inches tall and bear from six to a dozen $2\frac{1}{2}$ to 3 inch flowers in Cinnabar-red during the spring months. Plants with one or more leads at \$7.50 each.

Laelia Harpophylla; Plants 12 to 18 inches tall, bears spikes of 4 or more three inch flowers of Bright Orange-Red color with a white edge on the lip of some types. Plants with one or more leads at \$7.50 each.

Cattleya Bickneri; Stems of these are from 2 to $3\frac{1}{2}$ feet tall. bears several flowers of medium size ranging in color from green to bronze-green, some types are spotted with purple dots, other types are without the spots. Lip color varies from Lavender to purple. Single lead plants at \$10.00 each.

Cattleya Granulosa; Stems up to 20 inches tall, bears flowers of Yellow-green spotted with red, lip yellow or yellow-green spotted with red. Very useful and unusual variety. Plants at \$10.00 each.

Cattleya Leopoldii. Some types of these grow up to four feet tall and produce large spikes of from five to twenty-five flowers from three to five inches in diameter, in several color combinations varying from yellow-green, Nile-green to bronze-green and other shades, some types being dotted with red or purple dots. Lip colors from lavender to purple. Two sizes of plants available, Smaller size up to 2 feet tall at \$10.00. Large size plants up to four feet tall at \$15.00 each.

Cattleya Forbesii; Plants from 12 to 15 inches in the tallest types bearing small yellow flowers up to three inches wide in the best types. Similar to *Cattleya Harrisonae* in habit of Growth. \$7.50 each.

Sophranitis Grandiflora; These are real miniature plants growing only about three inches tall, bearing flowers from 2 to 3 inches in diameter (a few larger) of rose-red, scarlet to carmine-purple flowers. Plants with one or more leads at \$5.00 each.

Oncidium Rogersii; The Golden Dancing Lady Orchid. Plants 6 to 10 inches tall bearing tall spikes of beautiful golden colored flowers shaped like a dancing lady with a large ruffled skirt. Single lead plants at \$5.00.

(Please do not ask us to pick out certain types of the above plants for you as this is impossible as these have not flowered since importation and we do not know the variations that will show up in this lot.)

complete listings please write us for them.)

1953 List of Other Orchid
Varieties Available in
Limited Numbers.

These plants are Divisions of Established Plants from our stock of Florists types which are seldom offered to the Amature trade. The demand for these types of flowers is increasing all the time and we may regret selling any of them. We reserve the right to withdraw this offer at anytime

Cattleya Intermedia. Plants from 12 to 24 inches tall bearing whitish to lavender pink flowers about 4 to $4\frac{1}{2}$ inches in diameter. usually four to six on a spike. Good keepers when cut. Plants from \$5.00 to 7.50 each.

Cattleya Harrisonae; Simular to the above except the flowers have more of a round shape and the petals are wider. various shades of lavender-pink to violet purple. (not marked as to color). Very profitable cut-flower type. large plants sometimes bear as many as 15 flowers per spike. Plants from \$5.00 to 10.00 each according to size. (Summer)

Cattleya Loddegeessii. Like the above except they flower during the Winter time. \$5.00 to \$10.00 each according to size.

Cattleya Warnerii. Summer producers of regular Cattleya type flowers, Mostly in the darker shades. Bulbs tend to spread out unless tied up while growing. Does not do well in some parts of this country. Summer flowers, usually during June. \$5.00 each.

Odontoglossum Citrosmun; Sometimes called Odont. Pendulum. Plants about 15 inches tall producing drooping spikes of beautiful round white to pale pink flowers, as many as twenty to the spike, heavy textured and wonderful cut flowers avaraging three inches accross. Plants at \$7.50

Lycaste Aromatica. This is usually not used as a cut-flower altho they could be if there is a demand for small yellow corsage flowers. Plants about 2 feet tall producing from 12 to 20 golden-yellow flowers about $2\frac{1}{2}$ to 3 inches in diameter from each new bulb. Does not need as much heat as cattleyas, can be grown with Cymbidiums. Flowers last long on the plant and fairly well when cut. Plants from \$2.50 to \$5.00 each

Miltonia Hybrids. These are the Well known Pansy Orchids. We have a few Mature plants, mostly in white shades with colored markings at \$10.00 each and a few smaller plants to flower within the next year or two in several different crosses at \$5.00 each. These are no good as cut-flowers but last up to six or seven weeks on the plant and are very attractive.

Epidendron Hybrids. The lapel Orchid. Plants grow from three to four feet tall and produce spikes of up to 75 flowers from 1 to $1\frac{1}{2}$ inches in diameter. We have about 20 different colors of these and offer them at offshoot plants with roots ready to pot at ~~\$1.00~~ 1.00 each or four for \$3.00. Six for \$4.00. Write us for the list of colors available at the time. These can be grown out-of-doors during Mild weather.

NEW List of Other Orchids Various Available in Limited Numbers.

These plants are Division of Established Plants from our stock of
 various types which are seldom offered to the amateur trader. The demand
 for these types of flowers is increasing all the time and we may regret
 selling any of them. We reserve the right to withdraw this offer at any time.

Cattleya Intermedia. Plants from 12 to 24 inches tall bearing white to
 lavender or light flowers about 4 to 6 inches in diameter. Usually from 2 to
 six on a spike. Good keepers when cut. Plants from \$5.00 to \$7.50 each.

Cattleya Harrisonii. Similar to the above except the flowers have more
 of a round shape and the petals are whiter. Various shades of lavender-
 pink to violet purple (not marked as to color). Very profitable one-
 flower type. Large plants sometimes bear as many as 12 flowers per spike.
 Plants from \$5.00 to \$10.00 each according to size. (Number)

Cattleya lobata. Like the above except they flower during the
 winter time. \$5.00 to \$10.00 each according to size.

Cattleya. Some of the most beautiful of all orchids. They are
 usually from 12 to 24 inches tall and bear flowers of various colors
 and sizes. Some of the most beautiful are the *Cattleya* and *Cattleya*.

Oncidium. Sometimes called Odont. Some of the most beautiful of all orchids.
 about 12 inches tall producing drooping spikes of beautiful round white
 to pale pink flowers, as many as twenty on the spike, heavy textured and
 wonderful for flowers averaging three inches across. Plants at \$7.50

Cyclopogon. This is usually not used as a cut-flower plant.
 They could be if there is a demand for small yellow cone-like flowers.
 Plants about 2 feet tall producing from 12 to 20 golden-yellow flowers
 about 2 1/2 to 3 inches in diameter from each new bulb. Does not need as
 much heat as *Cattleya*, can be grown with *Cymbidium*. Flowers last long
 on the plant and fairly well when cut. Plants from \$2.50 to \$5.00 each.

Miltonia. These are the well known Pansy Orchids. We have a
 few *Miltonia* plants, mostly in white shades with colored markings at \$10.00
 each and a few earlier plants to flower within the next year or two in
 several different crosses at \$5.00 each. These are no good as cut-flower
 but last up to six or seven weeks on the plant and are very attractive.

Epiphenon. The label Orchids. Plants grow from three to four
 feet tall and produce spikes of up to 75 flowers from 1 to 1 1/2 inches
 in diameter. We have about 20 different colors of these and offer them
 at \$1.00 each. Plants with roots ready to pot at \$1.00 each or more.
 Write us for the list of colors available.
 These can be grown out-of-doors during mild weather.

1953 list of
Dendrobiums.

Seedlings

- # 662 Dendrobium Speciosum. Imported adult plants of this specie are hard to flower. Hot-house raised seedlings should be much easier. This is a beautiful thing and much worth while growing. Plants in 1½ inch pots at \$1.50 each
- 641 Dend. Nobile x D. Superbum. very vigorous growers which should be easier than Nobile and larger flowered. Plants from 4 to 6 inches tall at \$2.00 each. Smaller plants at \$1.00 each.
- 643 Dend. Nobile x D. Hildebrandtii. Similar to the above but of different shape and colored flowers. Large plants up to 6 inches tall at \$2.00 each. Small plants at \$1.00 each.
- 655 Dendrobium Nobile x Dend. Tortile var. Roseum. Named D. Niobe. Habit of growth somewhat similar to the above. result as to color and type of flowers unknown. Plants at 1.00 and \$2.00 each.
651. Dendrobium (Phalaenopsis x Formosum) x D. Phalaenopsis var. Pure white. The Pod parent was white with pink tipped petals and pink lip. fall and winter flowering. Plants in 1½ inch pots at \$1.50 each.

Larger Dendrobium Plants.

Dendrobium Pierardii. Hanging type with flowers in pastel shades of cream and lavender. plants in 2 inch pots at \$1.00 each.

Dend. Nobile. Grown from seed in California. Ready to flower. priced according to size from \$2.50 to \$10.00

Dend. Gibsonii. Habit of growth similar to nobile but more slender. Yellow flowers. Priced according to size at \$2.50 to \$5.00 each.

(We have many other varieties of Dendrobiums ,but too few of each to list. If interested please write regarding the types you wish and we will be glad to quote you on those available.)
